History

Morgan Stanley

Senior UI Developer : January 2024 - March 2025 (1 year 3 months)

Montreal, Canada

(React, Redux toolkit, TypeScript, Redux-Saga, Jenkins, ShadCN)

- Collaborated directly with stakeholders to gather requirements and translate them into a scalable frontend architecture
- Architected and documented application state management for a UI project using Redux, including event-driven patterns and data normalization;
- Designed and implemented a tailored React learning curriculum for junior developers with Angular backgrounds, fostering faster skill adoption and improved front-end development capabilities.
- Led code reviews to uphold high standards of code quality, maintainability, and alignment with industry best practices.

Orium

Fullstack Developer : March 2022 - August 2023 (1 year 6 months)

Remote

(Next.js, React, Redux toolkit, GraphQL/Apollo, Composable commerce, Node Express, Mongo, TypeScript, Google Analytics, GTM)

- Optimized dynamic CMS-driven components to ensure a seamless, high-performance user experience.
- Migrated the POS system from Adobe Analytics to Google Analytics and Google Tag Manager
- Conducted both accessibility and page speed audits and presented quantitative findings to shareholders with proposed solutions.
- Integrated new features into legacy POS (PWA) for in-store employees, including barcode scanning, inventory/size checks, and emailable wishlists.
- Managed product migration from MongoDB to CommerceTools and Integrated new endpoints into GraphQL server

Sycle

Senior UI Developer : October 2021 - March 2022 (6 months)

Remote

(Next.js, React, TypeScript, Storybook)

- Lead the development of a HIPAA-compliant real-time chat feature for a medical appointment scheduling platform, adhering to strict privacy and security standards.
- Advocated for accessibility best practices, implementing inclusive design even in areas not legally required
- Built and maintained a scalable, reusable component library in Storybook.

Ingrooves Music Group

Web User Interface Developer : October 2020 - March 2021 (6 months)

Victoria, Canada

(React, Redux, React hook form)

- Built reusable components to facilitate the development of an application to manage revenue streams from different channels for musicians.
- Collaborated with product and legal teams to align technical implementation with contract logic and industry-specific business rules.
- Documented and implemented UI integration testing strategy

SAP

UI Developer : April 2019 - February 2020 (11 months)

Montreal, Canada

(JS, Java, Hybris, Angular, Spartacus)

- Contributed to accessibility remediation efforts for Costco's multi-location e-commerce platform, helping mitigate a legal risk related to non-compliance with WCAG
- Conducted accessibility testing to audit UI components and rewrote large portions of the frontend to ensure semantic HTML and ARIA compliance
- Helped architect a migration plan from a traditional Hybris storefront to Spartacus, SAP's headless, Angular-based frontend framework.

Acne Studios AB

Frontend Developer : September 2018 - February 2019 (6 months)

Stockholm, Sweden

(JS, Webpack, Salesforce, Google Analytics)

- Championed migration of dev tooling to Webpack, achieving a large reduction in bundle size through aggressive code splitting, and CSS splitting.
- Took initiative to remove editorial bottlenecks by developing an internal tool in spare time for parsing XML to streamline CMS content editing and uploading, improving editorial efficiency.
- Spearheaded the development of a multi-stage checkout flow, enhancing the customer purchase experience and increasing conversion potential.
- Mentored junior developers on Git workflows, frontend best practices, and development fundamentals, fostering team growth.

SSENSE

Fullstack Developer : May 2017 - July 2018 (1 year 3 months)

Montreal, Canada

(Vue, Typescript, Docker, K8, Node, React, Redux, Google Analytics)

- Led internal Vue.js training sessions during lunch hours to upskill team members on framework fundamentals and best practices.
- Integrated Google Analytics sales funnel into the checkout process.
- Developed core Checkout and Cart pages for ssense.com, delivering seamless and performant shopping experiences.
- Worked with Webpack to optimize frontend asset bundling, actively monitoring and improving application performance.
- Championed unit testing practices and collaborated with cross-functional teams to enhance code quality and deployment reliability

Education

Hyper Island

E-commerce Marketing and Business Management · (2013 - 2014) Stockholm, Sweden
